

SLASH COSTS ON YOUR SUPPLY CHAIN OPERATIONS WITH CLOUD TECHNOLOGY

In this infographic, we'll explore how to integrate the following elements into your supply chain operations:

- Cloud Management
- Cybersecurity
- FinOps Governance
- Advanced Solutions

THE RESULT?

Greater savings, boosted efficiency, and rock-solid security.

CLOUD MANAGEMENT PLATFORMS

Cloud Management Platforms (CMPs) can boost efficiency by providing granular insights into usage tracking and budget setting. This facilitates strategic cloud allocation, ensuring resources are optimally distributed according to ever-changing needs.

Success Story

CTG's implementation of a cloud-based CRM solution for Indorama Ventures led to:

- 30%** Decrease in order processing time
- 40%** Reduction in purchase orders requiring human intervention
- Annual Savings of Over **\$400,000**

FINOPS GOVERNANCE

FinOps tools cut costs and boost efficiency. Cost allocation tagging and budget alerts provide visibility into spending and usage, enabling teams to focus on strategic ROI-driven initiatives.

CYBERSECURITY

Merging cybersecurity and FinOps tools is a recipe for success. Monitoring security and spending in real time ensures compliance, cuts costs, and sets you up for a sustainable future.

ADVANCED CLOUD SOLUTIONS

Go beyond traditional virtual machines with:

- Containers
- PaaS (Platform-as-a-Service)
- SaaS (Software-as-a-Service)

They're agile, scalable, and hassle-free alternatives that streamline ops and take you to the next level.
